**FORM 2**  
**MCH BUDGET DETAILS FOR FY 2006**

[Secs. 504 (d) and 505(a)(3)(4)]

**STATE: WI**

**1. FEDERAL ALLOCATION**

(Item 15a of the Application Face Sheet [SF 424])

Of the Federal Allocation (1 above), the amount earmarked for:

A.Preventive and primary care for children:

\$ 3,620,663 ( 32.27 %)

B.Children with special health care needs:

\$ 3,366,588 ( 30.01 %)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 562,251 ( 5.01 %)

(The above figure cannot be more than 10% ) [Sec. 504(d)]

**2. UNOBLIGATED BALANCE** (Item 15b of SF 424)

\$ 0

**3. STATE MCH FUNDS** (Item 15c of the SF 424)

\$ 9,259,451

**4. LOCAL MCH FUNDS** (Item 15d of SF 424)

\$ 0

**5. OTHER FUNDS** (Item 15e of SF 424)

\$ 0

**6. PROGRAM INCOME** (Item 15f of SF 424)

\$ 3,658,506

**7. TOTAL STATE MATCH** (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 4,721,800

\$ 12,917,957

**8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)**

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 24,137,651

**9. OTHER FEDERAL FUNDS**

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 100,000

c. CISS: \$ 0

d. Abstinence Education: \$ 609,958

e. Healthy Start: \$ 202,500

f. EMSC: \$ 0

g. WIC: \$ 66,185,837

h. AIDS: \$ 1,101,536

i. CDC: \$ 26,638,327

j. Education: \$ 0

k. Other: \$ 0

HRSA \$ 617,579

Lead \$ 1,301,000

**10. OTHER FEDERAL FUNDS** (SUBTOTAL of all Funds under item 9)

\$ 96,756,737

**11. STATE MCH BUDGET TOTAL**

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 120,894,388

### FIELD LEVEL NOTES

1. **Section Number:** Main  
**Field Name:** StateMCHFundsExpended  
**Row Name:** State Funds  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
This variance, an increase of \$947,140 (10.38%), is due entirely to an increase in the amount of match provided by local agencies.
2. **Section Number:** Main  
**Field Name:** ProgramIncomeExpended  
**Row Name:** Program Income  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
This variance, a decrease of \$487,361 (15%), is due to some local agencies not reporting their program income in time for inclusion in the annual report. It is expected that at least an additional \$300,000 will be reported.
3. **Section Number:** Main  
**Field Name:** ProgramIncomeExpended  
**Row Name:** Program Income  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
This variance, an increase of \$790,396 (27.56%), is due entirely to an increaese in the amount of program income generated by local agencies providing family planning/reproductive health services.

## FORM NOTES FOR FORM 4

None

### FIELD LEVEL NOTES

**1. Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** PregWomenExpended

**Row Name:** Pregnant Women

**Column Name:** Expended

**Year:** 2003

**Field Note:**

This variance, a decrease of \$555,938 (23%), is due to decreases in the Title V and Maintenance of Effort components of the Federal/State Partnership - \$351,730 and \$196,150 respectively.

The Title V decrease is primarily due to two factors: 1) 75% is due to a decrease in State Operations activities supporting services to pregnant women, and 2) 25% is due to a decrease in the expenditures of Local Public Health Departments (LPHD), Statewide projects and Tribal agencies.

**2. Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** Children\_0\_1Expended

**Row Name:** Infants <1 year old

**Column Name:** Expended

**Year:** 2003

**Field Note:**

This variance, an increase of \$777,558 (52%), is due to increases in the Title V and Match components of the Federal/State Partnership - \$383,791 and \$393,353 respectively.

The Title V increase is due to two factors: 1) 54% is due to an increase in expenditures by Local Public Health Departments (LPHDs) for services to Infants, and 2) 43% is due to an increase in expenditures by Statewide projects.

The Match increase is a reflection of the increases LPHD and Statewide project expenditures described in the previous paragraph. Since a minimum 75% match requirement is imposed on Title V funds allocated to LPHDs and Statewide projects, any increase in those funds will be followed by an increase in Match.

**3. Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** Children\_0\_1Expended

**Row Name:** Infants <1 year old

**Column Name:** Expended

**Year:** 2004

**Field Note:**

This variance, an increase of \$866,744 (60.47%), is due to an increase in expenditures in the Title V and Match components of the Federal/State Partnership - approximately \$505,000 and \$358,000 respectively. Title V expenditures increased for local aids by \$350,000 and for state operations by \$150,000. The increase in local aids generated the subsequent increase in match in a similar amount.

### FIELD LEVEL NOTES

1. **Section Number:** Main  
**Field Name:** EnablingExpended  
**Row Name:** Enabling Services  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
The variance, an increase of \$479,290 (13%), is due to increases in the Title V and Match components of the Federal/State Partnership - \$207,979 and \$4289,311 respectively.  
  
Title V increase is due to an increase in the expenditures of LPHDs, Statewide projects and Regional CSHCN Centers.  
  
The Match increase is a reflection of the increases LPHD and Statewide project expenditures described in the previous paragraph. Since a minimum 75% match requirement is imposed on Title V funds allocated to LPHDs and Statewide projects, any increase in those funds will be followed by an increase in Match.
2. **Section Number:** Main  
**Field Name:** EnablingExpended  
**Row Name:** Enabling Services  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
This variance, an increase of \$511,038 (13.55%), is due to an increase in the Title V and Match components of the Federal/State Partnership. Local agencies received an increase in Title V funds of \$102,000 and reported an increase of \$408,000 in match.
3. **Section Number:** Main  
**Field Name:** PopBasedExpended  
**Row Name:** Population-Based Services  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
The variance, an increase of \$165,264 (16%), is due to an increase in the Match component of the Federal/State Partnership. LPHDs and Statewide projects reported more expenditures for population based services.
4. **Section Number:** Main  
**Field Name:** PopBasedExpended  
**Row Name:** Population-Based Services  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
This variance, an increase of \$106,675 (10.9%), is due almost entirely to an increase in the amount of match reported by local agencies.

**FORM 6**

**NUMBER AND PERCENTAGE OF NEWBORNS AND OTHERS SCREENED, CASES CONFIRMED, AND TREATED**

*Sect. 506(a)(2)(B)(iii)*

**Screening Programs for Older Children & Women (Specify Tests by name)**

- (1) Use occurrent births as denominator.  
 (2) Report only those from resident births.  
 (3) Use number of confirmed cases as denominator.

## FORM NOTES FOR FORM 6

Occurrent births: For CY 2004, according to the birth file closed 3/31/05, there were 69,017 occurrent births in Wisconsin; these data are provisional, Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy. The count of occurrent births for 2004 is not available until the summer of 2006.

Data Issues: NBS data files and birth certificate records are not linked. Provisional occurrent birth data indicate a small discrepancy between the numbers of babies born in Wisconsin and the numbers screened; these data will not be final until summer 2005. These files are not linked.

NBS data includes resident and occurrent births. Resident birth data are not available.

## FIELD LEVEL NOTES

Others	48,730	69.4	1.0	23.3	4.0	2.3
<b>TOTAL</b>	<b>190,230</b>					

## FORM NOTES FOR FORM 7

Sources: Title V program data and Reproductive Health/Family Planning (RH/FP) data come from SPHERE (Secure Public Health Electronic Record Environment, data collection system used by agencies receiving Title V funds), local agency reports, and 2004 NBS data from the Wisconsin State Laboratory of Hygiene. RH/FP data include Title V/GPR and Title X-funded clinics.

Health care coverage are required fields for local agencies that use SPHERE. Agencies not using SPHERE were required to report on health care coverage.

The data for primary sources of coverage for infants are: 1) estimates from the 2002 birth file; the 2003 birth file was not available for estimates of primary sources of coverage and NBS data do not have primary sources of coverage; 2) SPHERE data from 2004, and 3) local agency reports from 2004.

### FIELD LEVEL NOTES

**1. Section Number:** Main

**Field Name:** Children\_0\_1\_TS

**Row Name:** Infants <1 year of age

**Column Name:** Title V Total Served

**Year:** 2006

**Field Note:**

Data issues: Total infants <1 year of age includes: 1) 68,895 and 2) Title V = [4,364 (637 CSHCN infants ) + (3,737 infants)]. The NBS file, SPHERE (data collection system used by agencies receiving Title V funds) and local agencies' data systems are not linked; therefore, the Title V infants are included in the NBS numbers because it's likely those infants were screened. The percentage of primary source of coverage for Title V infants are: Title XIX - 22.0%, Title XXI - 8.3%, Private/Other - 29.6%, None - 3.5%, Unknown - 36.6%.

**2. Section Number:** Main

**Field Name:** AllOthers\_TS

**Row Name:** Others

**Column Name:** Title V Total Served

**Year:** 2006

**Field Note:**

Data issue: Others served include: 1) Title V = 7,232, 2) FP/RH = 41,498 (Title V/GPR and Title X-funded clinics).

**FORM 10**  
**TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT**  
**STATE PROFILE FOR FY 2006**  
*[SEC. 506(A)(1)]*  
**STATE: WI**

1. State MCH Administration:  
(max 2500 characters)

The Title V MCH/CSHCN Block Grant funds are administered by the Wisconsin Division of Public Health, Bureau of Community Health Promotion, Family Health Section. The FHS is clearly demarcated within the Division as the designee for administration of the Title V activities. This clear demarcation serves as a critical component to ensure comprehensive program activity and a single point of accountability for the state. The Family Health Section contains the MCH Unit which includes the MCH Program and the CSHCN Program.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 11,219,694
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 9,259,451
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 0
7. Program Income (Line 6, Form 2)	\$ 3,658,506
<b>8. Total Federal-State Partnership (Line 8, Form 2)</b>	<b>\$ 24,137,651</b>

9. Most significant providers receiving MCH funds:

Local Health Departments
Tribal Agencies
Family Planning Providers
Statewide and regional nonprofit agencies

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	9,389
b. Infants < 1 year old	68,895
c. Children 1 to 22 years old	59,874
d. CSHCN	3,342
e. Others	48,730

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:  
(max 2500 characters)

Approximately 40% of Wisconsin's Title V funds are distributed to local agencies and organizations (including tribes) on an annual basis through the Division of Public Health's performance-based contracting process. The purpose of performance-based contracting is to help agencies focus on improving health status and health outcomes for Wisconsin's citizens. Performance-based contracting is a non-competitive process and LHD's have the "first right of refusal" to the allocated funds. Every fall, the Division of Public Health initiates a three-way negotiation process with representatives from the LHD's, the DPH regional office staff, and the DPH central office staff. To make the negotiation process easier, LHD's may (but are not required to) select from a list of template objectives developed specifically by the MCH/CSHCN Program that align with Wisconsin's priority needs for the maternal and child health population. (Template objectives are "pre-approved" activities and, as a result, streamline the negotiation process.) In 2004, the MCH/CSHCN Program had developed 13 template objectives addressing the following topics: pregnancy and healthy outcomes; comprehensive physical exams for uninsured or underinsured children; child passenger safety; home safety assessments; prevention and intervention for early childhood dental caries; newborn home visitation; health education activities; nutrition coalition building; and breastfeeding promotion. See Attachment C for Year 2005 Template Objectives for the Maternal and Child Health Program. If LHD's do not select a template objective(s), then they must create a separate, distinct objective(s) that meets the needs of the maternal and child health population within their jurisdiction. In addition, the objective must be deemed as an acceptable activity by the MCH/CSHCN Program.

b. Population-Based Services:  
(max 2500 characters)

Request for Proposals for statewide and regional MCH/CSHCN projects are released on a competitive basis approximately every 5 years. In the Spring 2005, we embarked on a new competitive process with statewide program activities scheduled to begin July 1, 2005 through December 31, 2010. The five statewide projects will address services to: improve infant health and reduce disparities in infant mortality; support a genetics system of care; improve child health and prevent childhood injury and death; improve maternal health and maternal care; and create a parent to parent matching program for families with CSHCN. The creation of the Regional CSHCN Centers in January 2000 was in response to a series of assessments conducted throughout Wisconsin with families and providers along with technical assistance from national experts over the course of several years. The next funding cycle begins January 1, 2006 through December 31, 2010. We are in the process of finalizing the model drawing on lessons learned and inputs received from providers and consumers. The goal is to establish regional leadership, as an extension of the state CSHCN Program and enhance the local capacity to serve children and youth with special health care needs and their families and to meet the six National Performance Outcomes, as part of the President's New Freedom Initiative. Additional key model elements include: consultation; referral and follow-up; health benefits counseling; medical and dental home; training and technical assistance; and adolescent transitioning to adult care.

c. Infrastructure Building Services:  
(max 2500 characters)

Wisconsin's Title V dollars are at work to build systems to include: family planning and reproductive health; perinatal services; newborn blood and hearing screening; early childhood comprehensive services; child health services including oral health, asthma, and injury; children with special health care needs through the development of regional CSHCN centers; parent-to-parent support network; poison control services; integration of medical home; and the MCH Hotline (1-800-722-2295) including First Step for families who have children with special health care needs.

12. The primary Title V Program contact person:

13. The children with special health care needs (CSHCN) contact person:

## FORM NOTES FOR FORM 11

National Performance Measures: Data for these measures are from several sources, including national and state surveys, and data systems maintained by the state of Wisconsin. Data for measures #1 and 12 are CY 2004; data for measures #8, 10, 13, 15, 16, 17, and 18 are for CY 2003 from the Wisconsin Department of Health and Family Services, Bureau of Health Information and Policy; these data are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2004 data will not be available until mid-2006. Data for measures #2, 3, 4, 5, and 6 are from the National Center for Health Statistics (NCHS) State and Local Area Integrated Telephone Survey (SLAITS) CSHCN module. Data for measures #7 and 14 are SFY 2004. Data for measure #9 are estimates for CY 2004. Data for measure #11 are for CY 2003.

Negotiated State Performance Measures: Data for these measures are from several sources, including state surveys, national data systems, and data systems maintained by the state of Wisconsin. Data for measures #1, 3, 14 and 15 are for CY 2003; these data are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2004 data will not be available until mid-2006. Data for measure #2 are collected by the Family Planning Program in Wisconsin. Data for measures #4 and 12 are from surveys that are administered every other year (#4) or when funding is available (#12). Data for #7 and #13 are for 2003 from CDC; data for 2004 will not be available until mid-2006. Data for #16 are Title V-specific data from the Secure Public Health Electronic Record Environment (SPHERE) and MCH-funded agencies reports for 2003.

### FIELD LEVEL NOTES

1. **Section Number:** Performance Measure #1

**Field Name:** PM01

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Numerator: NBS program, State Lab of Hygiene, Wisconsin, 2002. The number of infants that were confirmed with a condition through newborn screening that receive appropriate follow-up care.

Denominator: NBS program, State Lab of Hygiene, Wisconsin, 2002. The number of infants confirmed with a condition through newborn screening.

This performance measure focuses on whether state newborn screening programs are ensuring that infants picked up on newborn screening are receiving appropriate follow-up care. The old Performance Measure #4 measured the percentage of infants born in the state and screened by newborn screening.

2. **Section Number:** Performance Measure #1

**Field Name:** PM01

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Source: Numerator: NBS program, State Lab of Hygiene, Wisconsin, 2003. The number of infants that were confirmed with a condition through newborn screening and who receive appropriate follow-up care.

Denominator: NBS program, State Lab of Hygiene, Wisconsin, 2003. The number of screened through NBS and confirmed with a condition.

Wisconsin screens for 26 congenital disorders. Every newborn with an abnormal NBS result is tracked by the NBS Program to a normal result or appropriate clinical care.

3. **Section Number:** Performance Measure #1

**Field Name:** PM01

**Row Name:**

**Column Name:**

**Year:** 2004

**Field Note:**

Source: Numerator: NBS program, State Lab of Hygiene, Wisconsin, 2004. The number of infants that were confirmed with a condition through newborn screening and who receive appropriate follow-up care.

Denominator: NBS program, State Lab of Hygiene, Wisconsin, 2004. The number of screened through NBS and confirmed with a condition.

Wisconsin screens for 26 congenital disorders. Every newborn with an abnormal NBS result is tracked by the NBS Program to a normal result or appropriate clinical care.

4. **Section Number:** Performance Measure #2

**Field Name:** PM02

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: SLAITS CSHCN Survey.

Numerator: Weighted Wisconsin-specific data.

Denominator: Weighted Wisconsin-specific data.

Data issues: These are new data from the national SLAITS CSHCN Survey. Wisconsin data are weighted; however, the actual number who were asked if they partner in decision making and are satisfied with the services they receive was 275. Because of the small sample size, Wisconsin will be examining other sources of information for future years to supplement the national data.

5. **Section Number:** Performance Measure #2

**Field Name:** PM02

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Source: NCHS SLAITS CSHCN module; the data reported in 2002 pre-populated the data for 2003 for this performance measure.

6. **Section Number:** Performance Measure #2

**Field Name:** PM02

**Row Name:**

**Column Name:**

**Year:** 2004

**Field Note:**

The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.

7. **Section Number:** Performance Measure #3

**Field Name:** PM03

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: SLAITS CSHCN Survey.

Numerator: Weighted Wisconsin-specific data.

Denominator: Weighted Wisconsin-specific data.

Data issues: These are new data from from the national SLAITS CSHCN Survey. Wisconsin data are weighted; however, the actual number who were asked if the child receives coordinated, ongoing, comprehensive care within a medical home was 707. Because of the small sample size, Wisconsin will be examining other sources of information for future years to supplement the national data.

8. **Section Number:** Performance Measure #3

**Field Name:** PM03

**Row Name:**  
**Column Name:**  
**Year:** 2003

**Field Note:**  
Source: NCHS SLAITS CSHCN module; the data reported in 2002 pre-populated the data for 2003 for this performance measure.

**9. Section Number:** Performance Measure #3

**Field Name:** PM03

**Row Name:**  
**Column Name:**  
**Year:** 2004

**Field Note:**  
The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.

**10. Section Number:** Performance Measure #4

**Field Name:** PM04

**Row Name:**  
**Column Name:**  
**Year:** 2002

**Field Note:**  
Source: SLAITS CSHCN Survey.  
Numerator: Weighted Wisconsin-specific data.  
Denominator: Weighted Wisconsin-specific data.  
Data issues: These are new data from from the national SLAITS CSHCN Survey. Wisconsin data are weighted; however, the actual number who were asked if the child has adequate private and/or public insurance to pay for the services they need was 720. Because of the small sample size, Wisconsin will be looking for other sources of information for future years to supplement the national data.

**11. Section Number:** Performance Measure #4

**Field Name:** PM04

**Row Name:**  
**Column Name:**  
**Year:** 2003

**Field Note:**  
Source: NCHS SLAITS CSHCN module; the data reported in 2002 pre-populated the data for 2003 for this performance measure.

**12. Section Number:** Performance Measure #4

**Field Name:** PM04

**Row Name:**  
**Column Name:**  
**Year:** 2004

**Field Note:**  
The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.

**13. Section Number:** Performance Measure #5

**Field Name:** PM05

**Row Name:**  
**Column Name:**  
**Year:** 2002

**Field Note:**  
Source: SLAITS CSHCN Survey.  
Numerator: Weighted Wisconsin-specific data.  
Denominator: Weighted Wisconsin-specific data.  
Data issues: These are new data from from the national SLAITS CSHCN Survey. Wisconsin data are weighted; however, the actual number who were asked if the family of the child reports that community-based service systems are organized so they can use them easily was 275. Because of the small sample size, Wisconsin will be looking for other sources of information for future years to supplement the national data.

**14. Section Number:** Performance Measure #5

**Field Name:** PM05

**Row Name:**  
**Column Name:**  
**Year:** 2003

**Field Note:**  
Source: NCHS SLAITS CSHCN module; the data reported in 2002 pre-populated the data for 2003 for this performance measure.

**15. Section Number:** Performance Measure #5

**Field Name:** PM05

**Row Name:**  
**Column Name:**  
**Year:** 2004

**Field Note:**  
The data reported in 2004 are pre-populated with the data from 2003 for this performance measure.

**16. Section Number:** Performance Measure #6

**Field Name:** PM06

**Row Name:**  
**Column Name:**  
**Year:** 2002

**Field Note:**  
Source: SLAITS CSHCN Survey.  
Data issues: Maine is the only state that met the NCHS standards for reliability for PM 6; therefore, the 2002 indicator we use is the national average.

**17. Section Number:** Performance Measure #6

**Field Name:** PM06

**Row Name:**  
**Column Name:**  
**Year:** 2003

**Field Note:**  
Source: NCHS SLAITS CSHCN module; the data reported in 2002 pre-populated the data for 2003 for this performance measure.

**18. Section Number:** Performance Measure #6

**Field Name:** PM06

**Row Name:**  
**Column Name:**  
**Year:** 2004

**Field Note:**

The data reported in 2004 are pre-populated with the data from 2003 for this performance measure. State data was not robust enough to use; therefore national data is shown. Projections for 2005-2009 are very rough estimates. We expect to have state-level data from the Wisconsin Family Health Survey in time for next year to supplement and adjust projections (if necessary).

19. **Section Number:** Performance Measure #7  
**Field Name:** PM07  
**Row Name:**  
**Column Name:**  
**Year:** 2002  
**Field Note:**  
 The data from the national immunization survey for Wisconsin for SFY 2002 demonstrates an estimated level for series complete among children two year (i.e., 19-35 months) of age to be 77.4%. Series complete is defined as 4 DTaP, 3 polio, 1 MMR, 3 Hib and 3 Hep B vaccine doses. The numerator is 681 and the denominator is 880. This estimate is a slight drop from the last year's (78.4%). We revised our objectives accordingly.
20. **Section Number:** Performance Measure #7  
**Field Name:** PM07  
**Row Name:**  
**Column Name:**  
**Year:** 2003  
**Field Note:**  
 Source: National immunization survey for Wisconsin for SFY 2003 (July 1, 2002--June 30, 2003) with 4 DTaP:3 polio:1 MMR:3 hep B :3 Hib among children 19-35 months of age for Wisconsin is 82.6% (727/880). The national goal for 2010 is 90%, we revised our objectives accordingly.
21. **Section Number:** Performance Measure #7  
**Field Name:** PM07  
**Row Name:**  
**Column Name:**  
**Year:** 2004  
**Field Note:**  
 Source: National immunization survey for Wisconsin for SFY 2004 (July 1, 2003--June 30, 2004) with 4 DTaP:3 polio:1 MMR:3 hep B :3 Hib among children 19-35 months of age for Wisconsin is 80.6% (709/880), a slight drop from last year's indicator of 82.6%. We speculate the drop may be due to the on and off again DTaP vaccine shortage or vaccine safety issues. Although the national goal for 2010 is 90%, we have slightly revised our objectives to reflect this year's data and program expertise.
22. **Section Number:** Performance Measure #8  
**Field Name:** PM08  
**Row Name:**  
**Column Name:**  
**Year:** 2002  
**Field Note:**  
 Sources: Numerator: Wisconsin Department of Health and Family Services, Wisconsin Division of Health Care Financing, Bureau of Health Information, Wisconsin Births and Infants Deaths, 2001, Madison, Wisconsin, 2001. Denominator: Wisconsin Bureau of Health Information, Census Estimates, 1999.  
 Data issues: Data for CY2002 are not available from the Bureau of Health Information until mid-2004.
23. **Section Number:** Performance Measure #8  
**Field Name:** PM08  
**Row Name:**  
**Column Name:**  
**Year:** 2003  
**Field Note:**  
 Sources: Numerator: Wisconsin Department of Health and Family Services, Wisconsin Division of Public Health, Bureau of Health Information and Policy, Wisconsin Births and Infants Deaths, 2003, Madison, Wisconsin, 2005. **31. Section Number:** Performance Measure #11

**Field Name:** PM11

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: 2001 Mothers Survey, Ross Products Division.

Numerator: Unweighted data.

Denominator: Unweighted data.

Data issues: Breastfeeding data are not recorded on the Wisconsin birth certificate or hospital discharge data; therefore, the data we report comes from the Ross Mothers Survey; an on-going survey mailed to a representative sample of new mothers with infants 1 month, 2 months, etc. until 1 year old. The mother self-reports the type of milk her baby was fed in the hospital, at 1 week, in the last 30 days, and most often in the last week. The survey does not distinguish between exclusive and partial breastfeeding.

**Field Note:**

Comment: Data collected via fax-back survey of all birth hospitals in early 2003.

Data issues: Numbers of births and babies screened are self-reported on the fax-back survey. Beginning in 2004, data will be collected from the new Wisconsin Early Hearing Detection and Intervention Tracking, Referral and Coordination (WE-TRAC) System.

**35. Section Number:** Performance Measure #12

**Field Name:** PM12

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Comment: Data on hearing screening are reported on one page of the newborn blood-spot card that goes to the Wisconsin State Lab of Hygiene. The data are delivered to us as a tab-delimited file at least once a month, converted to a SAS dataset, and used to compile monthly reports on hearing screening in Wisconsin. The hearing screening records are also sent directly to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) System.

Data issues: Hearing screening results are occasionally separated from the blood card, delaying accurate reporting. Alternatively, sometimes the blood screening is repeated, but not the hearing screening, therefore, there may be duplicate (inaccurate) reporting. Beginning in 2005, data will be collected directly from WE-TRAC which will place accurate testing and follow-up responsibility on the birth hospitals, lessening the possibility that hearing screening results (and follow-up services) will be lost or delayed.

Data issues: Estimated numbers have been rounded to the nearest 1,000. The annual Wisconsin Family Health Survey is a random digit dial telephone survey that collects and reports information about health status, problems, insurance coverage, and use of health care services among Wisconsin residents. The survey has questions about health-related limitations and chronic conditions for persons greater than age seventeen.

Indicator: 2003 data indicate a decrease in the percentage of children without health insurance in Wisconsin. The state's continued progress in reducing the percentage of children without health insurance can be associated with Wisconsin's maintenance of its "open enrollment policy" for BadgerCare and Medicaid. Despite a major deficit in the 2003-2005 biennial budget, only minor changes were made to Medicaid/BadgerCare's scope of services and its enrollment policies. Therefore, while other states opted to cap enrollment or to implement enrollment cuts, Wisconsin's "family Medicaid enrollment" has continued to increase. Because Wisconsin's "Children's Health Insurance Program" enrolls whole families, parents have an economic incentive to continue to enroll children. We have flat-lined out objectives to 2009 because we think it is unreasonable to go below 2% for this indicator.

Indicator: In our managed care-oriented "family Medicaid system," the percentage of child Medicaid/BadgerCare recipients actually receiving Medicaid through an HMO has been steadily dropping. As of April, 2005, the total number of recipients receiving MA through an HMO was about 353,000, according to the Wisconsin Assn of Health Plans. However, the total family Medicaid population has grown to 535,000. Therefore, only 65.9% family Medicaid recipients received services. Also, Medicaid HMOs have steadily withdrawn geographically from the rural areas. We have not revised our objectives because we believe that the 2003 indicator reflects the population entering the Medicaid program and does not accurately reflect trends.

**Column Name:**  
**Year:** 2002  
**Field Note:**  
 Source: Wisconsin Department of Health and Family Services, Wisconsin Division of Health Care Financing, Bureau of Health Information, Madison, 2004.  
 Data issues: These data for 2002 are corrected from the 2005 application/2002 report which were 570/831 = 68.6%; these data were births occurring only in Wisconsin hospitals. We are now using a consistent definition for facilities for high-risk deliveries and neonates; defined as "birth record indicates transfer "to NICU or another hospital" and the transfer hospital is the same as the birth hospital."  
 Corrected data since 2000 are:  
 2000: 676/814 = 83.0% (95% CI - 81.9%, 84.2%)  
 2001: 692/857 = 80.8% (95% CI - 79.5%, 82.0%)  
 2002: 646/831 = 77.7% (95% CI - 76.2%, 79.3%).  
 These data indicate a slight decrease in the percentage of very low birth infants born at high risk facilities for deliveries and neonates.
50. **Section Number:** Performance Measure #17  
**Field Name:** PM17  
**Row Name:**  
**Column Name:**  
**Year:** 2003  
**Field Note:**  
 Source: Wisconsin Department of Health and Family Services, Wisconsin Division of Public Health, Bureau of Health Information and Policy.  
 Data issues: In Wisconsin, hospitals self-designate level of care. Wisconsin does not have a regulatory function to standardize these self-designations. We are now using a consistent definition for facilities for high-risk deliveries and neonates; defined as "birth record indicates transfer "to NICU or another hospital" and the transfer hospital is the same as the birth hospital." Corrected data since 2000 are:  
 2000: 676/814 = 83.0% (95% CI - 81.9%, 84.2%)  
 2001: 692/857 = 80.8% (95% CI - 79.5%, 82.0%)  
 2002: 646/831 = 77.7% (95% CI - 76.2%, 79.3%)  
 2003: 698/870 = 80.2% (95% CI - 77.6%, 82.8%)  
 These data indicate a slight decrease in the percentage of very low birth infants born at high risk facilities for deliveries and neonates from 2000 to 2002, and the 2003 rate about the same as 2002. The four year average (2000-2003) is 80.4% (95% CI - 79.8%, 81.1%).  
 In addition, a Minnesota facility serves as the Level III perinatal center for high-risk deliveries in northwestern Wisconsin and does not provide birth data to our vital records.

**Year:** 2002  
**Field Note:**  
Sources: Numerator: Number of women receiving contraceptive services at GPR/Title V and Title X funded clinics. Denominator: Estimated number of Wisconsin women at risk of unintended pregnancy estimated by the Alan Guttmacher Institute (AGI).  
Data issues: Among the 1,199,350 women in Wisconsin ages 13-44, 625,000 are estimated to be at risk of unintended pregnancy and in need of contraceptive services and supplies. Of this number, 296,390 are estimated to be at risk of unintended pregnancy and in need of publicly supported contraceptive services: this includes 92,060 under age 20, and 204,330 between the ages of 20-44 and under 250% of poverty. The statewide denominator used to determine the percent of total estimated need in Wisconsin met through WI GPR/Title V funded services is 296,390. The basis for the projections for 2003-2008 objectives is implementation and continuation of the WI Medicaid waiver that expands eligibility for family planning services. We assume the Medicaid waiver, implemented January 1, 2003, will result in an increased number of women at risk of unintended pregnancy receiving services at publicly supported clinics; therefore, we revised our objectives accordingly.
59. **Section Number:** State Performance Measure #2  
**Field Name:** SM2  
**Row Name:**  
**Column Name:**  
**Year:** 2003  
**Field Note:**  
Sources: Numerator: Number of women receiving contraceptive services at GPR/Title V and Title X funded clinics. Denominator: Estimated number of Wisconsin women at risk of unintended pregnancy estimated by the Alan Guttmacher Institute (AGI). Revised 2000 estimates of need.  
Data issues: Among the 1,235,190 women in Wisconsin ages 13-44, 634,250 are estimated to be at risk of unintended pregnancy and in need of contraceptive services and supplies. Of this number, 230,060 are estimated to be at risk of unintended pregnancy and in need of publicly supported contraceptive services: this includes 95,350 under age 20, and 134,710 between the ages of 20-44 and under 250% of poverty. The statewide denominator used to determine the percent of total estimated need in Wisconsin met through WI GPR/Title V funded services is 230,060. The basis for the projections for 2004-2008 objectives is implementation and continuation of the WI Medicaid waiver that expands eligibility for family planning services. We assume the Medicaid waiver, implemented January 1, 2003, will result in an increased number of women at risk of unintended pregnancy receiving services at publicly supported clinics; therefore, we revised our objectives accordingly. Please note the following changes in 2003: 1) AGI released revised estimates of need for 2000, and the statewide denominator changed from 296,390 to 230,060; 2) an increased number of women received services in 2003 compared to 2002; and 3) the methodology for counting patients was changed in 2003 – from contraceptive patients receiving a physical examination to any patient receiving contraceptive management services as defined by a V25 ICD-9 code. The change in the denominator alone resulted in an increased percentage from 33.3% (98,678/296,390) to 42.9% (98,678/230,060).

Source: 2000 Pediatric Nutrition Surveillance System (PedNSS), Centers for Disease Control and Prevention.

Data issues: Height and weight data are collected by the WIC Program and sent to CDC for analysis by the Pediatric Nutrition Surveillance System (PedNSS). While the WIC data do not represent the population as a whole for children ages, 2-4, the data are readily available and represent many children who are at higher nutritional risk in Wisconsin. In December 2001, CDC began providing data analyses utilizing body mass index as a measurement for identifying children at risk of being overweight or children who are currently overweight using age and gender-specific growth charts. These new analyses provide an unduplicated count of children enrolled in the WIC program during the reporting period. The prevalence trends from the data will provide opportunities to target childhood overweight and develop prevention and intervention strategies, which may prevent overweight and obesity in adolescence and adulthood. 2002 data are not available until mid-2003.

**Year:** 2003

**Field Note:**

Data issues: Height and weight data are collected by the WIC Program and sent to CDC for analysis by the Pediatric Nutrition Surveillance System (PedNSS). While the WIC data do not represent the population as a whole for children ages 2-4, the data are readily available and represent a higher risk population in Wisconsin. Childhood overweight is increasing at alarming rates and is likely to continue to increase until a multi-faceted, comprehensive plan is implemented to improve nutrition and increase physical activity. The objective projections reflect this reality.

## FORM NOTES FOR FORM 12

Since 2004 data required by the TVIS, 2003 data were used as estimates for 2004. These data are maintained in retrospective state databases and are not released or published until 12-18 months after the end of the data year; therefore, 2004 data will not be available until mid-2006.

### FIELD LEVEL NOTES

**Year:** 2002

**Field Note:**

Source: Numerator and Denominator: Wisconsin Department of Health and Family Services, Wisconsin Division of Health Care Financing, Bureau of Health Information, Wisconsin Births and Infant Deaths, 2001. Madison, Wisconsin, 2003.

Data issues: Data for 2002 are not available from the Bureau of Health Information until mid-2004.

**11. Section Number:** Outcome Measure 4

**Field Name:** OM04

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Source: Numerator and Denominator: Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy, Wisconsin Births and Infant Deaths, 2003. Madison, Wisconsin, 2005.

**12. Section Number:** Outcome Measure 4

**Field Name:** OM04

**Row Name:**

**Column Name:**

**Year:** 2004

**Field Note:**

Since 2004 data required by the TVIS, 2003 data were used as estimates for 2004. These data are maintained in retrospective state databases and are not released or published until 12-18 months after the end of the data year; therefore, 2004 data will not be available until mid-2006.

**13. Section Number:** Outcome Measure 5

**Field Name:** OM05

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Numerator: Sum of fetal deaths  $\geq$  28 week and infant deaths  $<$  7 days (201 + 315). Denominator: Number of live births + number of fetal deaths, 2001.

Source: Wisconsin Department of Health and Family Services, Wisconsin Division of Health Care Financing, Bureau of Health Information, 2003.

Data issues: For previous years, the perinatal mortality rate was calculated using fetal deaths 20 or more weeks in gestation, not 28 or more weeks in gestation. Therefore, previous years' indicators were higher than for 2001; we revised our objectives accordingly. Data for 2002 are not available from the Bureau of Health Information until mid-2004.

**14. Section Number:** Outcome Measure 5

**Field Name:** OM05

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Numerator: Sum of fetal deaths  $\geq$  28 week and infant deaths  $<$  7 days (214 + ) from the fetal death report, Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy, 2005. Denominator: Sum of number of live births + number of fetal deaths, Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy, 2005.

Source: Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy, 2005.

Data issues: For years 1998-2001, the perinatal mortality rate was calculated using fetal deaths 20 or more weeks in gestation, not 28 or more weeks in gestation. Therefore, previous years' indicators were higher than for 2001; we revised our objectives accordingly.

**15. Section Number:** Outcome Measure 5

**Field Name:** OM05

## FORM NOTES FOR FORM 13

Information provided by the Family Centered Care Consultant in the Maternal and Child Health Program. Scoring methodology is included in the notes for each individual question.

### FIELD LEVEL NOTES

**1. Section Number:** Main

**Field Name:** Question1

**Row Name:** #1. Family members participate on advisory committee or task forces...

**Column Name:**

**Year:** 2006

**Field Note:**

Scoring methodology:

A. List advisory committees and/or task forces that exist within the CSHCN Program including both broader (i.e.: MCH/CSHCN Advisory Committee) and specific (i.e.: Universal Newborn Hearing Screening Program Work Group).

B. How many of those listed include family members? What is the percentage of advisory committees and/or task forces that include family members?

C. How do parents participate on the advisory committees and/or task forces? Are family members offered training, mentoring and reimbursement?

0 – Not Met. Fewer than 25% of the advisory committees and/or task forces include family members. Training, reimbursement and/or mentoring are not consistently offered as support to the family representatives.

1 – Partially Met. Fewer than 50% of the advisory committees and/or task forces include family members. Limited training, reimbursement or mentoring is offered as support to the family representatives.

2 – Mostly Met. More than 75% of the advisory committees and/or task forces include family members. Adequate training, reimbursement or mentoring is offered as support to the family representatives.

3 – Completely Met. All of the advisory committees and/or task forces include family members. Thorough training, reimbursement and mentoring is offered as support to the family representatives.

**2. Section Number:** Main

**Field Name:** Question2

**Row Name:** #2. Financial support (...) is offered for parent activities or parent groups.

**Column Name:**

**Year:** 2006

**Field Note:**

Scoring Methodology:

A. Check the support offered (payment or provided) for parent activities or participation:

- ☐ child care/respite care
- ☐ payment for time or services
- ☐ travel money for attendance
- ☐ lodging (when applicable)
- ☐ meals
- ☐ Other \_\_\_\_\_

B. Check the financial support offered to family organizations in the past year:

- ☐ Grants to Family Group or Organizations
- ☐ Mailings
- ☐ Clerical time
- ☐ Space for offices or meetings
- ☐ Staff time for technical assistance
- ☐ In Kind Services
- ☐ Other \_\_\_\_\_

☐ Total checked of the 13 Potential Opportunities

☐ Percentage

0 – Not Met. Fewer than 25% of the opportunities are provided for parent activities or family organizations. Financial Support is not consistently offered as support to family members or organizations.

1 – Partially Met. Fewer than 50% of the opportunities are provided for parent activities or family organizations. Limited Financial Support is offered as support to family members or organizations.

2 – Mostly Met. More than 75% of the opportunities are provided for parent activities or family organizations. Consistent Financial Support is offered as support to family members or organizations.

3 – Completely Met. All of the opportunities are provided for parent activities or family organizations. Strong Financial Support is offered as support to family members or organizations.

**3. Section Number:** Main

**Field Name:** Question3

**Row Name:** #3. Family members are involved in the Children with Special Health Care Needs...

**Column Name:**

**Year:** 2006

**Field Note:**

Scoring Methodology:

a. Check the ways families or family organizations are involved in your Block Grant application:

- ☐ Public Hearings to develop application
- ☐ Public Hearings to review completed application/provide feedback
- ☐ Focus groups/meetings for families to develop application
- ☐ Focus groups/meetings for families to review completed application/ provide feedback
- ☐ One or more family members invited to develop application
- ☐ One or more family members invited to review completed application/ provide feedback
- ☐ One or more family organizations invited to develop application
- ☐ One or more family organizations invited to review completed application/provide feedback
- ☐ Family Members and/or Organizations invited to develop needs assessment(s)
- ☐ Family Members surveyed to gather information for needs assessment(s)
- ☐ Family Organizations surveyed to gather information for needs assessment(s)
- ☐ Family Members and/or Organizations invited to provide input to Needs Assessment Summary in Block Grant Application
- ☐ Other (specify) \_\_\_\_\_

☐ Number of Items Checked of the 13 Potential Opportunities

☐ Percentage

0 – Not Met. Fewer than 25% of the opportunities are provided for parent activities or family organizations to give input into the Block Grant Application or Needs Assessment. Review or Input opportunities are not consistently offered to family members or organizations.

1 – Partially Met. Fewer than 50% of the opportunities are provided for parent activities or family organizations to give input into the Block Grant Application or Needs Assessment. Limited opportunities are offered to family members or organizations.

2 – Mostly Met. More than 75% of the opportunities are provided for parent activities or family organizations to give input into the Block Grant Application or Needs

Assessment. Consistent opportunities are offered to family members or organizations.

3 – Completely Met. All of the opportunities are provided for parent activities or family organizations. Strong opportunities are offered to family members or organizations.

**4. Section Number:** Main

**Field Name:** Question4

**Row Name:** #4. Family members are involved in service training of CSHCN staff and providers.

**Column Name:**

**Year:** 2006

**Field Note:**

Scoring Methodology:

a. List all of the in-service training opportunities that have been offered to CSHCN staff in the past year - may include orientations for new staff as well.  
b. Which ones have included a family member as a planner or co-presenter? Was the parent reimbursed for his/her time, travel or childcare costs?

Total Number of In-service Trainings \_\_\_\_\_

How many included family members? \_\_\_\_\_

Percentage \_\_\_\_\_

0 – Not Met. Fewer than 25% of the in-service trainings for CSHCN staff include family members. Reimbursement and/or stipends are not consistently offered as support to the family representatives.

1 – Partially Met. Fewer than 50% of the in-service trainings for CSHCN staff include family members. Limited reimbursement and/or stipends are offered as support to the family representatives.

2 – Mostly Met. More than 75% of the in-service trainings for CSHCN staff include family members. Adequate reimbursement and/or stipends are offered as support to the family representatives.

3 – Completely Met. All of the in-service trainings for CSHCN staff include family members. Thorough reimbursement and/or stipends are offered as support to the family representatives.

**5. Section Number:** Main

**Field Name:** Question5

**Row Name:** #5. Family members hired as paid staff or consultants to the State CSHCN program...

**Column Name:**

**Year:** 2006

**Field Note:**

Scoring Methodology:

a. How are family members employed with CSHCN Program?

Title V employs \_\_\_\_\_ family members as staff directly

Title V employs \_\_\_\_\_ family members as staff through another agency

Title V employs \_\_\_\_\_ family members as consultants directly

Title V employs \_\_\_\_\_ family members as consultants through another agency

b. Do family staff and consultants receive any of the following:

\_\_\_\_\_ Orientation for new staff upon being hired

\_\_\_\_\_ Mentoring from other staff

\_\_\_\_\_ Evaluation and assessment of employee functions

\_\_\_\_\_ Flexibility to accommodate needs of family similar to that of other staff

0 – Not Met. Family Members are not hired as paid staff or consultants in the CSHCN Program.

1 – Partially Met. A parent(s) is hired as a consultant to a specific project and the CSHCN Program has not begun to explore hiring a parent(s) as paid staff.

2 – Mostly Met. Parent(s) are hired as consultants to specific projects and the hiring of a parent(s) as staff has begun. Or a parent(s) is hired as staff and the hiring of a parent(s) as a consultant to a specific project has begun.

3 – Completely Met. A parent(s) is hired as paid staff and a parent(s) is hired as a consultant to specific projects as needs arise.

**6. Section Number:** Main

**Field Name:** Question6

**Row Name:** #6. Family members of diverse cultures are involved in all of the above activities

**Column Name:**

**Year:** 2006

**Field Note:**

Scoring Methodology:

a. Write down the diverse cultures that exist in the State.

b. Indicate which of the activities listed include family members from diverse cultures.

Family Members from diverse cultures are on advisory committees/task forces Yes/No

Family Members from diverse cultures are offered financial support Yes/No

Family Members from diverse cultures are involved in Block Grant Process Yes/No

Family Members from diverse cultures are involved in in-service training of staff Yes/No

Family Members from diverse cultures are hired as paid staff or consultants Yes/No

Family Members from diverse cultures are included in other unique ways Yes/No

Total number of activities including family members from diverse cultures \_\_\_\_\_

0 – Not Met. Family Members from diverse cultures are not involved in any of the activities of the CSHCN Program as described above.

1 – Partially Met. Family members from diverse cultures participate in one or two of the activities of the CSHCN Program. Or less than half of the diverse cultures in the State is represented in the activities of the CSHCN Program.

2 – Mostly Met. Family members from diverse cultures participate in three or four of the activities of the CSHCN Program. More than 75% of the diverse cultures in the State is represented in the activities of the CSHCN Program.

3 – Completely Met. Family members from diverse cultures participate in all of the activities of the CSHCN Program. All of the diverse cultures in the State are represented in all of the activities of the CSHCN Program.

**FORM 14**  
**LIST OF MCH PRIORITY NEEDS**

[Sec. 505(a)(5)]

**STATE: WI FY: 2006**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Disparities in Birth Outcomes: To improve birth outcomes among minority populations
2. Contraceptive Services (access to): To improve access and utilization to contraceptive services
3. Mental Health: To assure mental health services for all MCH populations
4. Medical Home: To assure a medical home for all children
5. Dental Health: To assure dental health for all children
6. Health Insurance and Access to Health Care: To assure health insurance and access to health care for all
7. Smoking and Tobacco Use: To decrease tobacco use among women and children
8. Intentional Childhood Injuries: To decrease intentional childhood injuries
9. Unintentional Childhood Injuries: To decrease unintentional childhood injuries
10. Overweight and At Risk for Overweight: To promote healthy lifestyles including promoting physical activity to achieve healthy weight

**FORM NOTES FOR FORM 15**

None

**FIELD LEVEL NOTES**

None

**FORM 16**  
**STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: WI**

SP # 1

**PERFORMANCE MEASURE:**

Percent of children less than 12 years of age who receive one physical exam a year.

**STATUS:**

Active

**GOAL**

Increase the percent of children less than 12 years of age who receive one physical exam per year.

**DEFINITION**

**Numerator:**

Weighted number of children who received at least one physical exam within the past year.

**Denominator:**

Census estimate of children during calendar year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin Family Health Survey, Bureau of Health Care Financing Annual EPSDT Participation Report

**SIGNIFICANCE**

Health maintenance through primary care services, including well child check-ups results in early detection and treatment of health problems and improves the chances of leading a healthy life. The implementation of Wisconsin's Children's Health Insurance Program (BadgerCare) will increase health care utilization by children birth to 12 years of age.

SP # 2

<b>PERFORMANCE MEASURE:</b>	Percent of women at risk of unintended pregnancies (as defined by Alan Guttmacher Institute) receiving family planning and related reproductive health services through publicly funded clinics.
<b>STATUS:</b>	Active
<b>GOAL</b>	To decrease the percent of unintended pregnancies in Wisconsin.
<b>DEFINITION</b>	<p><b>Numerator:</b> Number of women receiving contraceptive services at GPR/Title V and Title X funded clinics.</p> <p><b>Denominator:</b> Estimated number of Wisconsin women at risk of unintended pregnancy by AGI.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>

**HEALTHY PEOPLE 2010 OBJECTIVE**

<b>DATA SOURCES AND DATA ISSUES</b>	Family Planning data
<b>SIGNIFICANCE</b>	Unintended, untimely and unplanned pregnancy can adversely affect the health, social, and economic well being of women, children, and families. Approximately 44% of women and couples not using contraception and not seeking pregnancy will experience unintended pregnancy; only 7% of women and couples using contraception will experience an unintended pregnancy.

SP # 3

PERFORMANCE MEASURE:

Percent of women who use tobacco during pregnancy.

STATUS:

Active

GOAL

Decrease the percent of women who use tobacco during pregnancy.

DEFINITION

**Numerator:**

Number of women who self-report the use of tobacco during pregnancy during the calendar year.

**Denominator:**

Total number of live births to Wisconsin women per calendar year.

**Units:** 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Wisconsin birth certificate data file.

SIGNIFICANCE

Wisconsin's maternal smoking rate (16.5% in 2000) is above the national average (12.2% in 2000). Poor pregnancy outcomes due to maternal smoking are well documented. These substances can endanger the pregnancy and the newborn's health (low birth weight, higher risk of unsuccessful pregnancy and premature birth, and other health problems).

SP # 4

PERFORMANCE MEASURE:

Percent of high school youth who self-report taking a drink in the past 30 days.

STATUS:

Active

GOAL

Decrease the percent of high school youth who self-report taking a drink in the past 30 days.

DEFINITION

**Numerator:**

Unweighted estimate of high school youth surveyed (YRBS) who self-report use of alcohol.

**Denominator:**

Unweighted estimate of high school youth surveyed (YRBS).

**Units:** 100    **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Survey (YRBS)

SIGNIFICANCE

The acceptance of alcohol use in Wisconsin combined with the adolescent mindset of experimentation and risk-taking behaviors contributes to adolescent use. Delaying the age of first use can reduce the seriousness of associated problems. Strong collaborative efforts, especially at the community level, will increase awareness of harmful use and prevent use and abuse of alcohol.

SP # 7

PERFORMANCE MEASURE:

Percent of women enrolled in WIC during pregnancy who initiated breastfeeding.

STATUS:

Active

GOAL

To improve the health outcomes of infants and their mothers by increasing the incidence of breastfeeding.

DEFINITION

**Numerator:**

Number of women enrolled in WIC during pregnancy who initiated breastfeeding.

**Denominator:**

Number of women enrolled in WIC during pregnancy.

**Units:** 100    **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Pregnancy Nutrition Surveillance System (PNSS)/WIC data.

SIGNIFICANCE

The health benefits of breastfeeding are related to the duration of breastfeeding. The more breast milk an infant receives in the first 6 months of life, the less likely the baby will develop diarrhea, ear, upper and lower respiratory tract infections, and certain chronic diseases. The more fully and longer a woman breastfeeds the lower her risk of breast cancer, ovarian cancer, osteoporosis, and the better the child spacing for those not using contraceptives. Breastfeeding reduces health care and household food costs.

SP # 12

**PERFORMANCE MEASURE:**

Percent of children, ages 6-8, with untreated dental decay in primary and permanent teeth.

**STATUS:**

Active

**GOAL**

Reduce the percent of children, ages 6-8, with untreated dental decay in primary and permanent teeth.

**DEFINITION**

**Numerator:**

Number of children, ages 6-8, who have untreated dental decay in primary and permanent teeth.

**Denominator:**

Number of children, ages 6-8, in state during year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

National Health and Nutrition Examination Survey (NHANES), CDC, NCHS; Oral Health Survey of Native Americans, 1999, HIS; California Health Needs Assessment of Children 1993-94, Wisconsin surveillance activity.

**SIGNIFICANCE**

To avoid pain and discomfort, decayed primary teeth need to be restored, particularly molars in children aged 6 to 8 years. Retention of primary molars until they fall out normally (aged 10 to 12 years) allow adequate dental arch space for the eruption of succeeding permanent premolars and avoids the tipping forward of first permanent molars, possibly creating serious orthodontic problems. Carious permanent teeth should be repaired promptly so that fillings may be kept small and as much natural tooth as possible conserved. Often, fillings have to be replaced several times during life; each time, additional tooth structure has to be removed, weakening the tooth. Preventing the initial cavity by appropriate use of fluorides and sealants is preferable to restoring the tooth after disease has occurred.

SP # 13

**PERFORMANCE MEASURE:**

Percent of children, ages 2-4, who are obese or overweight.

**STATUS:**

Active

**GOAL**

To reduce the percent of children, ages 2-4, who are obese or overweight

**DEFINITION**

**Numerator:**

Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin at => 95 percentile during the reporting period.

**Denominator:**

Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

CDC, Pediatric Nutrition Surveillance System (PedNSS)/WIC data.

**SIGNIFICANCE**

Childhood and adolescent obesity can lead to negative psychosocial and medical conditions. Medical conditions related to child and adolescent obesity can be both short and long-term. Overweight and obese children are at risk for sleep apnea, orthopedic complications, Type 2 diabetes, and elevated levels of cholesterol, blood pressure, triglycerides, and fasting insulin. Overweight adolescents have a 1.5 to 2-fold increased risk for being overweight as adults. As a result, they are also at increased risk for long-term medical conditions such as coronary heart disease, colon cancer, diabetes, asthma, and arthritis.

SP # 14

**PERFORMANCE MEASURE:**

Ratio of the black infant mortality rate to the white infant mortality rate.

**STATUS:**

Active

**GOAL**

To reduce the disparity (ratio) between the black and white infant mortality rates.

**DEFINITION**

**Numerator:**

The black infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

**Denominator:**

The white infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

**Units:** 1 **Text:** Ratio

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

State vital records.

**SIGNIFICANCE**

A significant gap exists in Wisconsin between the infant mortality rates (IMR) of African American and white infants. Infants born to African American women in Wisconsin are almost three times as likely to die in the first year of life than infants born to white mothers. This disparity of 3 to 1 exceeds the disparity of 2.4 to 1 for the nation as a whole. Although the overall IMR for Wisconsin declined from 17 infant deaths per 1,000 live births in 1970 to 7.2 per 1,000 in 1998, the IMR for African American babies hovered near 18 per 1,000 live births for the last decade. The IMR for whites was 5.6 infant deaths per 1,000 live births in 1998 compared to the black rate of 17.9 per 1,000 live births. This trend continued in 1999 and 2000.

SP # <u>15</u>	
PERFORMANCE MEASURE:	Death rate per 100,000 among youth, ages 15-19, due to motor vehicle crashes.
STATUS:	Active
GOAL	To decrease the number of deaths to youths, ages 15-19, due to motor vehicle crashes.
DEFINITION	<p><b>Numerator:</b> The number of deaths from motor vehicle crashes in Wisconsin to youths, ages 15-19, during the reporting period.</p> <p><b>Denominator:</b> The number of youths in Wisconsin, ages 15-19, during the reporting period.</p> <p><b>Units:</b> 100000    <b>Text:</b> Rate per 100,000</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	Wisconsin death certificate data file.
SIGNIFICANCE	Motor vehicle crashes are the leading cause of death for youth. Wisconsin's young drivers are more likely to be in a motor vehicle crash than any other age group.

SP # 16

**PERFORMANCE MEASURE:**

The percent of MCH clients/families who receive one or more supportive services\* to enhance child health, development and/or safety.

**STATUS:**

Active

**GOAL**

Increase the percentage of MCH clients/families who receive one or more supportive service from Title V to enhance child health,

**DEFINITION**

\*Supportive services include: parent-to parent for CSHCN, firearm safety, child passenger safety, parentin classes, home safety assessments, bike and helmet safety, personal safety, and child development screening.

**Numerator:**

Number of clients/families who received supportive services from Title V. (Car restraint use, bicycle helmet use, parenting skills, peronsal safety, firearms in home safety, home hazard assessments corrections made).

**Denominator:**

Number of clients/families who recevied services from Title V.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

All programs report from the MCH Data System.

**SIGNIFICANCE**

If children are to realize their full potential as adults they need parents who have the capacity to safely and effectively support their growth and development. Is is the community's responsibility to assist famlies in gaining these skills through supportive services.

## FORM NOTES FOR FORM 17

Data issues: 2003 and 2004 data for HSI #1 are not available from the Wisconsin DHFS which had the hospital discharge data only through September 30, 2003. The responsibility for collection of hospital inpatient discharge records from Wisconsin hospitals was transferred to the Wisconsin Hospital Association at that time. Access by DHFS to more recent discharge records is pending completion of negotiations on a data use agreement. The 2003 and 2004 indicators for HSI#1 are estimates based on the most 4 quarters available. Data for 2004 for HSCIs # 2, 3, and 7 represent the state fiscal year for 2004. Data for 2004 for HSCI #4 are provisional from the Bureau of Health Information and Policy. Data for HSCI#8 are program data from the Wisconsin Department of Health and Family Services, Division of Health Care Financing.

### FIELD LEVEL NOTES

**1. Section Number:** Health Systems Capacity Indicator #01

**Field Name:** HSC01

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Wisconsin Division of Health Care Financing, Bureau of Health Information. Numerator: Number of children under 5 hospitalized with asthma (ICD 9=493) as a primary diagnosis, 2002 Wisconsin Hospital Discharge File. Denominator: Number Wisconsin children under 5, 2000 Census.

Data issues: Beginning in 2000, the reported asthma numbers are based on deduplicated counts of children with asthma hospitalization. Before 2000, the counts and rates are based on numbers of hospitalizations. Using the previous method, in 2000, there were 888 asthmas hospitalizations for children under 5, or 26.1 per 10,000. In 2001, there were 1,002 asthma hospitalizations for children under 5, or 29.3 per 10,000.

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Numerator and denominator from the Medicaid Evaluation and Decision Support Data Warehouse for SFY2002.

Data issues: BadgerCare began in July 1999 as a Medicaid program to implement SCHIP. Low-income uninsured families who are not eligible for Medicaid qualify for BadgerCare if family income is at or below 185% of the federal poverty level (FPL). Families remain eligible for BadgerCare until their income exceeds 200% FPL. BadgerCare has increased enrollment of children in Medicaid. Since the implementation of BadgerCare, an additional 74,900 children have enrolled in Medicaid. Many BadgerCare families are mixed \_ younger children are in Medicaid, who are eligible for Healthy Start with incomes up to 185% of the FPL, and older siblings and parents in BadgerCare. An increase in the numbers of infants to age one receiving at least one EPSDT service from BadgerCare has increased due to continued growth of the program. Families enrolled with incomes below 185% and remain with income ranges between 185% to 200 FPL. Families with an income at or above 150% of the federal poverty level pay a premium equal to 3% of their income.

15. **Section Number:** Health Systems Capacity Indicator #07  
**Field Name:** HSC07  
**Row Name:**  
**Column Name:**  
**Year:** 2004  
**Field Note:**  
Source: Numerator and denominator from the Medicaid Evaluation and Decision Support Data Warehouse for SFY2004. The difference in the percentage of EPSDT eligible children receiving services from SFY2003 to SFY 2004 is statistically significant (53.1% to 34%). In Wisconsin's managed care-oriented "family Medicaid system," the percentage of child Medicaid or BadgerCare recipients actually receiving Medicaid through an HMO has been steadily dropping. As of April, 2005, the total number of recipients receiving MA through an HMO is about 353,000, according to the Wisconsin Assn of Health Plans. However, the total family Medicaid population has grown to 535,000. This means that only 65.9 percent of all family Medicaid recipients receive HealthCheck through a system with financial incentives to render HealthCheck in WI.  
A "Medicaid managed care map" of Wisconsin shows that MA HMOs have steadily withdrawn from rural areas, especially. Therefore, although the number of Medicaid/BadgerCare children has steadily grown, the number of children who receive Medicaid through a system that provides financial incentives to perform HealthCheck has not.
16. **Section Number:** Health Systems Capacity Indicator #08  
**Field Name:** HSC08  
**Row Name:**  
**Column Name:**  
**Year:** 2002  
**Field Note:**  
Sources: The denominator is 13,010 as per the report from MCHB sent on 4/11/03. The numerator will be the same as the indicator is 100%.  
Data issues: All SSI Beneficiaries less than 16 years old are automatically eligible for Wisconsin's Medicaid Program which provides comprehensive rehabilitative services. As such, Title V's role is focused on assuring families are aware of and enrolled in SSI. This is consistent with other States with universal Medicaid coverage for these services."

## FORM NOTES FOR FORM 18

Data for HSCI#05a (lbw) and #05c (first trimester pnc) are for 2004. 2004 data for #05b (infant deaths) from the matching data files are not available, we used the most recent available from 2002. Data for #05d (Kotelchuck Index) by Medicaid/non-Medicaid for 2004 are not available; we used the most recent available from 2002.

### FIELD LEVEL NOTES

1. **Section Number:** Indicator 05  
**Field Name:** InfantDeath  
**Row Name:** Infant deaths per 1,000 live births  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
2003 and 2004 data from the birth death linked files are not available. We used estimates from 2002.
2. **Section Number:** Indicator 05  
**Field Name:** AdequateCare  
**Row Name:** Percent of pregnant women with adequate prenatal care  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
2004 data are not available for this indicator by Medicaid/non-Medicaid; therefore we used the most current available which was 2002. The overall percentage of women in 2004 who received adequate prenatal care (Kotelchuk Index) was 85.2%[

**HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM**  
**STATE: WI**

**HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)**  
*(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)*

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
<b>ANNUAL DATA LINKAGES</b>		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	No
Annual linkage of birth certificates and WIC eligibility files	3	No
Annual linkage of birth certificates and newborn screening files	1	No
<b>REGISTRIES AND SURVEYS</b>		
Hospital discharge survey for at least 90% of in-State discharges	1	No
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	1	No

\*Where:  
1 = No, the MCH agency does not have this ability.  
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.  
3 = Yes, the MCH agency always has this ability.

**FORM 19**  
**HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM**  
**STATE: WI**

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Other: The Wisconsin Youth Tobacco Survey		Yes

**HEALTH SYSTEMS CAPACITY INDICATOR #09C (Data Capacity) Overweight/Obesity**  
*(The Ability of the State to Determine the Percent of Children Who are Obese or Overweight)*

Data Source	Does your state participate in this survey/data source? (Select 1 - 3)*	Does your MCH program have direct access to this electronic database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Pediatric Nutrition Surveillance System (PedNSS)	3	No
WIC Program Data	3	Yes
Other: Behavior Risk Factor Surveillance System	3	Yes
Pregnancy Nutrition Surveillance System (PNSS)	3	No

\*Where:

1 = No

2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.

3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

## FORM NOTES FOR FORM 20

Since 2004 data are required by the TVIS in a needs assessment year, the data for 2004 are estimates based on 2003 data. Most of these data are maintained in retrospective administrative databases by the Wisconsin Department of Health and Family Services, Bureau of Health Information and Policy and will not be released until 2006. For HSI #01A - #02B, 2004 data will not be available from the Bureau of Health Information and Policy until 2006. For HSI #03C, 04A, 04B, and 04C, we used the most recent 3 quarters available for 2003 and 2004. As of September 2003, hospital discharge data is the responsibility of the Wisconsin Hospital Association and access by DHFS to more recent discharge data is pending completion of negotiations on a data use agreement; therefore, injury and hospitalization data are collected and maintained by the Wisconsin. Data for HSI #05A and 05B are from the Bureau of Communicable Disease and Preparedness.

## FORM NOTES FOR FORM 21

Data issues: These data are estimates, as required by the TVIS, data from administrative databases, for example, vital records for 2004, are not available from the Bureau of Health Information and Policy until 2006.

HSI#06A: Demographics (Total Population): These data are estimates from the US Census Bureau, Annual State Population Estimates.

HSI #08A: Total deaths:

"Asian" includes: Chinese, Filipino, Other Asian and Pacific Islanders, Korean, Hmong, Japanese, Laotian, Vietnamese and Cambodian

"Native Hawaiian or Other Pacific Islanders" includes: Hawaiians

"Multiple Race Reported": Beginning with 2003 death data, when reported, more than one race was collected on the death certificate. There was 1 infant whose race was listed as both White and American Indian. This infant is NOT listed under either race in this table, only under "Multiple Race Reported".

**11. Section Number:** Indicator 11

**Field Name:** S11\_total

**Row Name:** Total Population

**Column Name:**

**Year:** 2006

**Field Note:**

The Wisconsin Department of Health and Family Services, Bureau of Health Information and Policy, produces mid-year population estimates for the counties and state of Wisconsin by age and sex categories for non-Census years. Estimates are used to calculate population-based health statistics. The estimates are compared to the U.S. Census Bureau's 2000 base estimates, which reflect Census Bureau modifications to the Census 2000 population counts.

**12. Section Number:** Indicator 09A

**Field Name:** HSIRace\_FosterCare

**Row Name:** Number living in foster home care

**Column Name:**

**Year:** 2006

**Field Note:**

Cases open as of 12/31/03; excludes adoptive home and voluntary kinship cases. Source: Wisconsin Department of Health and Family Services, eWiSACWIS.

**NEW STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: WI**

SP # 1

**PERFORMANCE MEASURE:**

Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.

**GOAL**

Increase the percent of income eligible reproductive-age women in Wisconsin who are enrolled in the Wisconsin Medicaid Family Planning Waiver.

**DEFINITION**

**Numerator:**

Number of women enrolled in the Family Planning Waiver

**Denominator:**

Number of women, ages 15-44, estimated to be Medicaid income eligible minus those who have existing Medicaid/BadgerCare coverage.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

9.3

Increase the proportion of females at risk of unintended pregnancy (and their partners) who use contraception.

**DATA SOURCES AND DATA ISSUES**

Enrollment data from Wisconsin Department of Health and Family Services, Division of Health Care Financing, Medicaid program data.

**SIGNIFICANCE**

Access to affordable and quality contraceptive and related reproductive health services is necessary for increased use of contraception among sexually active women and couples at risk of unintended pregnancy.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 2

**PERFORMANCE MEASURE:**

Percent of Medicaid and BadgerCare recipients, ages 3-20, who received any dental service during the reporting year.

**GOAL**

To increase the percentage of Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the state fiscal year.

**DEFINITION**

**Numerator:**

Numerator: Number of Wisconsin Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the state fiscal year.

**Denominator:**

Denominator: Total number of Wisconsin Medicaid and BadgerCare, aged 3-20, recipients during the state fiscal year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

21-12

Increase the proportion of children and adolescents under age 19 years of age at or below 200 percent of the Federal poverty level who received any preventive dental service during the past year.

21-10

Increase the proportion of children and adults who use the oral health care system each year.

**DATA SOURCES AND DATA ISSUES**

Wisconsin Department of Health and Family Services, Division of Health Care Financing, Medicaid Program, claims and eligibility data for services provided.

**SIGNIFICANCE**

Oral diseases and conditions can be consequential to growth, function, ability to attend to learning, self-image and employability. The most frequent symptom of dental pathology is pain which can distract children from learning and playing, and limit their ability to eat and speak. Extensive early childhood caries has been shown to inhibit attainment of normal weight and height in toddlers. Dental and oral diseases are increasingly understood to compromise general health and function. Dental visits increase with increasing income and parental education. Low-income children who suffer from the most dental disease have the least access to care, despite publicly financed dental coverage.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 3

**PERFORMANCE MEASURE:**

Percent of children, ages 6 months-5 years, who have age-appropriate social and emotional developmental levels.

**GOAL**

To increase the percentage of children with age-appropriate social and emotional developmental levels.

**DEFINITION**

**Numerator:**

The number of children, ages 6 months through 5 years, who have age-appropriate social and emotional developmental levels.

**Denominator:**

The number of children, ages 6 months through 5 years, who receive mental health screening using the "Ages and Stages Questionnaire: Social and Emotional Domain during the reporting period (ASQ:SE)."

**Units:** Text: 0

**HEALTHY PEOPLE 2010 OBJECTIVE**

18-7

Increase the proportion of children with mental health problems who receive treatment.

**DATA SOURCES AND DATA ISSUES**

Secure Public Health Electronic Record Environment (SPHERE) data reported by agencies who perform mental health screening for young children using the "Ages and Stages Questionnaire®: Social-Emotional (ASQ:SE)". This questionnaire/screening tool assesses children's social-emotional development at 6, 12, 18, 24, 30, 36, 48, and 60 months.

**SIGNIFICANCE**

Infant and early childhood mental health is of growing interest in public health. Wisconsin Governor Jim Doyle's KidsFirst Initiative recommends implementation of the Wisconsin Infant and Early Childhood Mental Health Plan developed by the Wisconsin Initiative for Infant Mental Health. One of the key recommendations is mental health screening and referral for children birth to age five. SPHERE collects information on developmental screening provided by POCAN, Home Visitation Outcomes Projects, and Title V-funded projects (local health departments and private non-profits including CSHCN Regional Centers and Regional Center contractees), and Tribal Agencies (Honoring our Children). POCAN is the acronym for the comprehensive targeted home visiting program authorized under 46.515 Wisconsin statutes and stands for Prevention of Child Abuse and Neglect. In 2004, 2,662 Wisconsin children under six years of age received a developmental assessment.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 4

**PERFORMANCE MEASURE:**

Number of of substantiated reports of child maltreatment to Wisconsin children, ages 0 - 17, during the year.

**GOAL**

To decrease the number of children, ages 0-18, being maltreated in Wisconsin during the reporting year.

**DEFINITION**

The number of substantiated reports of child maltreatment to Wisconsin children, ages 0-18, during the calendar year.

**Numerator:**

The number of child abuse and neglect reports and substantiations in a given calendar year.

**Denominator:**

The number of children under age 18.

**Units:**   **Text:** 0

**HEALTHY PEOPLE 2010 OBJECTIVE**

15-33

Reduce maltreatment and maltreatment fatalities of children.

15-34

Reduce the rate of physical assault by current or former intimate partners (for persons 12 and older).

**DATA SOURCES AND DATA ISSUES**

Annual Report to the Governor and Legislature on Wisconsin Child Abuse and Neglect, Office of Policy, Evaluation and Planning, Division of Children and Family Services, Wisconsin Department of Health and Family Services.

**SIGNIFICANCE**

Child maltreatment has physical, psychological, behavioral and societal consequences that can lead into long-term physical and mental health problems and economic consequences.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 5

**PERFORMANCE MEASURE:**

Percent of children who receive coordinated, ongoing comprehensive care within a medical home.

**GOAL**

To increase the percentage of Wisconsin children who have a medical home.

**DEFINITION**

The American Academy of Pediatrics describes care from a medical home as accessible, continuous, coordinated, family-centered, comprehensive, compassionate and culturally-competent.

**Numerator:**

Weighted number of children whose parents responded that their children have a usual source of health care.

**Denominator:**

Weighted number of children whose parents participated in the Family Health Survey.

**Units:**   **Text:** 0

**HEALTHY PEOPLE 2010 OBJECTIVE**

1-4. Access to quality health services.

Increase the proportion of persons who have a specific source of ongoing care.

**DATA SOURCES AND DATA ISSUES**

Wisconsin Department of Health and Family Services, Division of Public Health, Family Health Survey.

**SIGNIFICANCE**

A medical home is an approach to providing continuous and comprehensive primary care in a high-quality and cost-effective manner.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 6

**PERFORMANCE MEASURE:**

Percent of children less than 12 years of age who receive one physical exam a year.

**GOAL**

Increase the percent of children less than 12 years of age who receive one physical exam per year.

**DEFINITION**

**Numerator:**

Weighted number of children who received at least one physical exam within the past year.

**Denominator:**

Census estimate of children during calendar year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin Family Health Survey, Bureau of Health Care Financing Annual EPSDT Participation Report

**SIGNIFICANCE**

Health maintenance through primary care services, including well child check-ups results in early detection and treatment of health problems and improves the chances of leading a healthy life. The implementation of Wisconsin's Children's Health Insurance Program (BadgerCare) will increase health care utilization by children birth to 12 years of age.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 7

**PERFORMANCE MEASURE:**

Percent of women who use tobacco during pregnancy.

**GOAL**

Decrease the percent of women who use tobacco during pregnancy.

**DEFINITION**

**Numerator:**

Number of women who self-report the use of tobacco during pregnancy during the calendar year.

**Denominator:**

Total number of live births to Wisconsin women per calendar year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin birth certificate data file.

**SIGNIFICANCE**

Wisconsin's maternal smoking rate (16.5% in 2000) is above the national average (12.2% in 2000). Poor pregnancy outcomes due to maternal smoking are well documented. These substances can endanger the pregnancy and the newborn's health (low birth weight, higher risk of unsuccessful pregnancy and premature birth, and other health problems).

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 8

**PERFORMANCE MEASURE:**

Percent of children, ages 2-4, who are obese or overweight.

**GOAL**

To reduce the percent of children, ages 2-4, who are obese or overweight

**DEFINITION**

**Numerator:**

Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin at => 95 percentile during the reporting period.

**Denominator:**

Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

CDC, Pediatric Nutrition Surveillance System (PedNSS)/WIC data.

**SIGNIFICANCE**

Childhood and adolescent obesity can lead to negative psychosocial and medical conditions. Medical conditions related to child and adolescent obesity can be both short and long-term. Overweight and obese children are at risk for sleep apnea, orthopedic complications, Type 2 diabetes, and elevated levels of cholesterol, blood pressure, triglycerides, and fasting insulin. Overweight adolescents have a 1.5 to 2-fold increased risk for being overweight as adults. As a result, they are also at increased risk for long-term medical conditions such as coronary heart disease, colon cancer, diabetes, asthma, and arthritis.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 9

**PERFORMANCE MEASURE:**

Ratio of the black infant mortality rate to the white infant mortality rate.

**GOAL**

To reduce the disparity (ratio) between the black and white infant mortality rates.

**DEFINITION**

**Numerator:**

The black infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

**Denominator:**

The white infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

**Units:** 1 **Text:** Ratio

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

State vital records.

**SIGNIFICANCE**

A significant gap exists in Wisconsin between the infant mortality rates (IMR) of African American and white infants. Infants born to African American women in Wisconsin are almost three times as likely to die in the first year of life than infants born to white mothers. This disparity of 3 to 1 exceeds the disparity of 2.4 to 1 for the nation as a whole. Although the overall IMR for Wisconsin declined from 17 infant deaths per 1,000 live births in 1970 to 7.2 per 1,000 in 1998, the IMR for African American babies hovered near 18 per 1,000 live births for the last decade. The IMR for whites was 5.6 infant deaths per 1,000 live births in 1998 compared to the black rate of 17.9 per 1,000 live births. This trend continued in 1999 and 2000.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 10

**PERFORMANCE MEASURE:**  
**GOAL**  
**DEFINITION**

Death rate per 100,000 among youth, ages 15-19, due to motor vehicle crashes.  
To decrease the number of deaths to youths, ages 15-19, due to motor vehicle crashes.

**Numerator:**  
The number of deaths from motor vehicle crashes in Wisconsin to youths, ages 15-19, during the reporting period.  
**Denominator:**  
The number of youths in Wisconsin, ages 15-19, during the reporting period.  
**Units:** 100000    **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin death certificate data file.

**SIGNIFICANCE**

Motor vehicle crashes are the leading cause of death for youth. Wisconsin's young drivers are more likely to be in a motor vehicle crash than any other age group.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------
